

iSound 44D

4x4 Digital Sound Processor w/ Dante

2 Dante audio

audio shaping tools

16 preset slots

phantom power

sound card

The iSound

D44 is a versatile digital signal processor based on A-DSP

Architecture with 40-bits floating point, capacity up to 400MIPS, 1600MFLOPS, 4x4 analog inputs and outputs, 4x4 Dante I/O channels.

In-built USB audio channel, which can process both analog and digital signals. It has great advantages on its core Algorithms which include AEC, AFS, ANS, AGC, and ANC. Supports RS232, RS485 and UDP control, and PoE power supply.
