Modular Multimedia Wall Plate

Datasheet V1.1

1. INTRODUCTION

The INFOBIT Multimedia Wall Plate System is a front-loading solution providing a clean and flexible system to integrate ethernet, USB data, audio and video into one wallplate.

Ideal for applications like healthcare, education, enterprise and government buildings, the front-loading capability makes the system easy to install, maintain and update. Changes are made without removing the wallplate from the wall, and all wiring and cabling is done from the front side of the wallplate.

The Multimedia Wall Plate System consists of dual-gang UK wallplate that accept a variety of HDMI, RJ45, USB A, USB B and full-featured USB C modules.
